Staffing Issues.

J1

3. PWHO. The Division still has no official confirmation of what is coming and when. If we do not have sight by 101000Z Mar, GOC now intends to remove F Echelon capability from 16 Air Asslt or 7 Armd Bde - with obvious implications. The subject will be dropped following this assesrep and tomorrow the we will inform NCC of how the requirement has been resourced from within the Division. All this being said, your work on this difficult issue has been hugely appreciated - thus far...(!) In addition, the MOU and MTA both need to be brought to a conclusion and the issue regarding disciplinary regulations needs to be addressed. Transport for the PWHO remains critical and the policy of JFLOGC of pooling vehicles is unsatisfactory if evacuation from the battlefield is to be in accordance with International legal obligations. The issue of PWHO manning remains "legal red" and requires resolution.
